3.2 Mixtures

Individually sealed pouch: One strip packed in a plastic cassette; 0,5 g silica gel

dessicant; one plastic dropper

Sample Diluent: 20 mM Phosphate buffer pH 7,2 - 7,4, 0,1% sodium azide

Note: the strip is composed of nitrocellulose membrane, vinyl matte adhesive, fiber absorbent pad, fiber sample pad, fiber conjugate pad. The nitrocellulose membrane and the fiber conjugate pad contain dried biological substances preserved by sodium azide. The identity of each biological substance is confidential

4- FIRST AID MEASURES

4.1 Description of first aid measures

If inhaled

Inhalation of any component in this kit is unlikely. If a component is inhaled and causes discomfort, move exposed

individual to fresh air. Seek medical attention if breathing is

difficult or synptoms persist.

If swallowed Ingestion of small amounts of the Sample Diluent should not

be toxic, however, a physicia should be immediately. The animal proteins and dried reagents absorbed into the nitrocellulose membrane and the fiber conjugate pad are very unlikely to be ingested or be hazardous by ingestion. However,

a physician should be consulted should ingestion occur.

In case of eye contact The test device is very unlikely to be contacted by eye,

however, contact physician should a contact occur. In case of contact with the Sample Diluent, immediately flush eyes with plenty of water for at least 15 minutes. Cold water may be

used. Get medical attention.

In case of skin contact The Sample Diluent is not likely to be hazardous by skin

contact. However in case of contact, immediately clean skin with plenty of water. Remove contamined clothing and shoes. Cold water may be used. Wash clothing before reuse. Thoroughly clean shoes before reuse. The animal proteins and dried reagents absorbed into the nitrocellulose membrane and the fiber conjugate pad are very unlikely to be hazardous by

skin contact, but clean the skin after use is advisable

4.2 Most important symptoms and effects, both acute and delayed

no data available

4.3 Indication of any immediate medical attention and special treatment needed

no data available

5 - FIRE-FIGHTING MEASURES

5.1 Extinguishing media For small fires, use dry chemical, carbon dioxide or alcohol-

resistant foam. No direct contact with water.

5.2 Special hazards arising from the substance or mixture

When involved in a fire, this material can be decompose and produce irritating fumes and toxic gases (e.g., Carbon

monoxide, Carbon dioxide, sulfuric dioxide)

5.3 Advice for firefighters

This material will not significantly contribute to the intensity of a fire. Use extinguishing material suitable to the surrounding fire. Utilize proper personal protective equipment when responding to any fire. Incipient fire responders should wear eye protection. Structural firefighters must wear Self-Contained Breathing Apparatus and full protective equipment. Move containers from fire area if it can be done without risk to personnel. If possible, prevent runoff water from entering storm drains, bodies of water, or other environmentally

6- ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Use personal protective equipment, lab coat and gloves

6.2 Environmental precautions Avoid disposal/reversal on waterways

6.3 Methods and material for containment and cleaning up

Use adsorbent paper towel or cloth to adsorb the spill solution and dispose or clean the contaminated surface in accordance

with local procedures or appropriate standards.

6.4 Reference to other sections For disposal see section 13.

7 - HANDLING AND STORAGE

7.1 Precautions for safe handling

Don't eat, drink, smoke or apply cosmetics in laboratory area. Use the product according to the product insert.

7.2 Conditions for safe storage, including any incompatibilities

Keep container tightly clossed. Keep product at 2-30°C. Do not freeze or expose to temperature higher than 30°C. Keep away from children.
