

## GELATIN PEPTONE BIOS

Peptone obtained by enzymatic hydrolysis of gelatin

### DESCRIPTION

Gelatin Peptone Bios is a pancreatic digest of gelatin with a low cystine and tryptophan content. It is also free of carbohydrates. This peptone is suitable for preparing media for microorganisms that are not particularly fastidious in their nutritional requirements.

### TYPICAL ANALYSIS

Proteins .....	> 88 %
Amino Nitrogen (AN) .....	2.0 – 3.3 %
Total Nitrogen (TN) .....	> 16 %
Ash .....	< 6.5 %
Sodium Chloride .....	< 4 %
pH (6 % solution) .....	6.6 – 7.5
Loss on drying .....	< 6 %

### Packaging
