

## LIVER EXTRACT

Dehydrated liver extract

### DESCRIPTION

Liver extract is a dehydrated and standardised extract from beef liver used for the preparation of infusion media. It is useful for the culture of *Trichomonas vaginalis* and other fastidious protozoa, for those culture media designed to target pathogenic fungi, anaerobic bacteria and PPLO.

### TYPICAL ANALYSIS

Total Nitrogen (TN) ..... 11.8 %  
Amino Nitrogen (AN) ..... 5.6 %  
Loss on drying ..... 4.1 %  
Ash..... 15.5 %  
pH (5 % solution) ..... 6.8  
Performances in microbiological culture media....passes test
